# Session Overview

Our FLC on "Intersections of Active Learning, Student Development and Student Success"

Our Artifact – An Active Learning Techniques Companion

Table Conversations – Case Studies

Discussion

Q&A

# Intersections of Active Learning, Student Development and Student Success

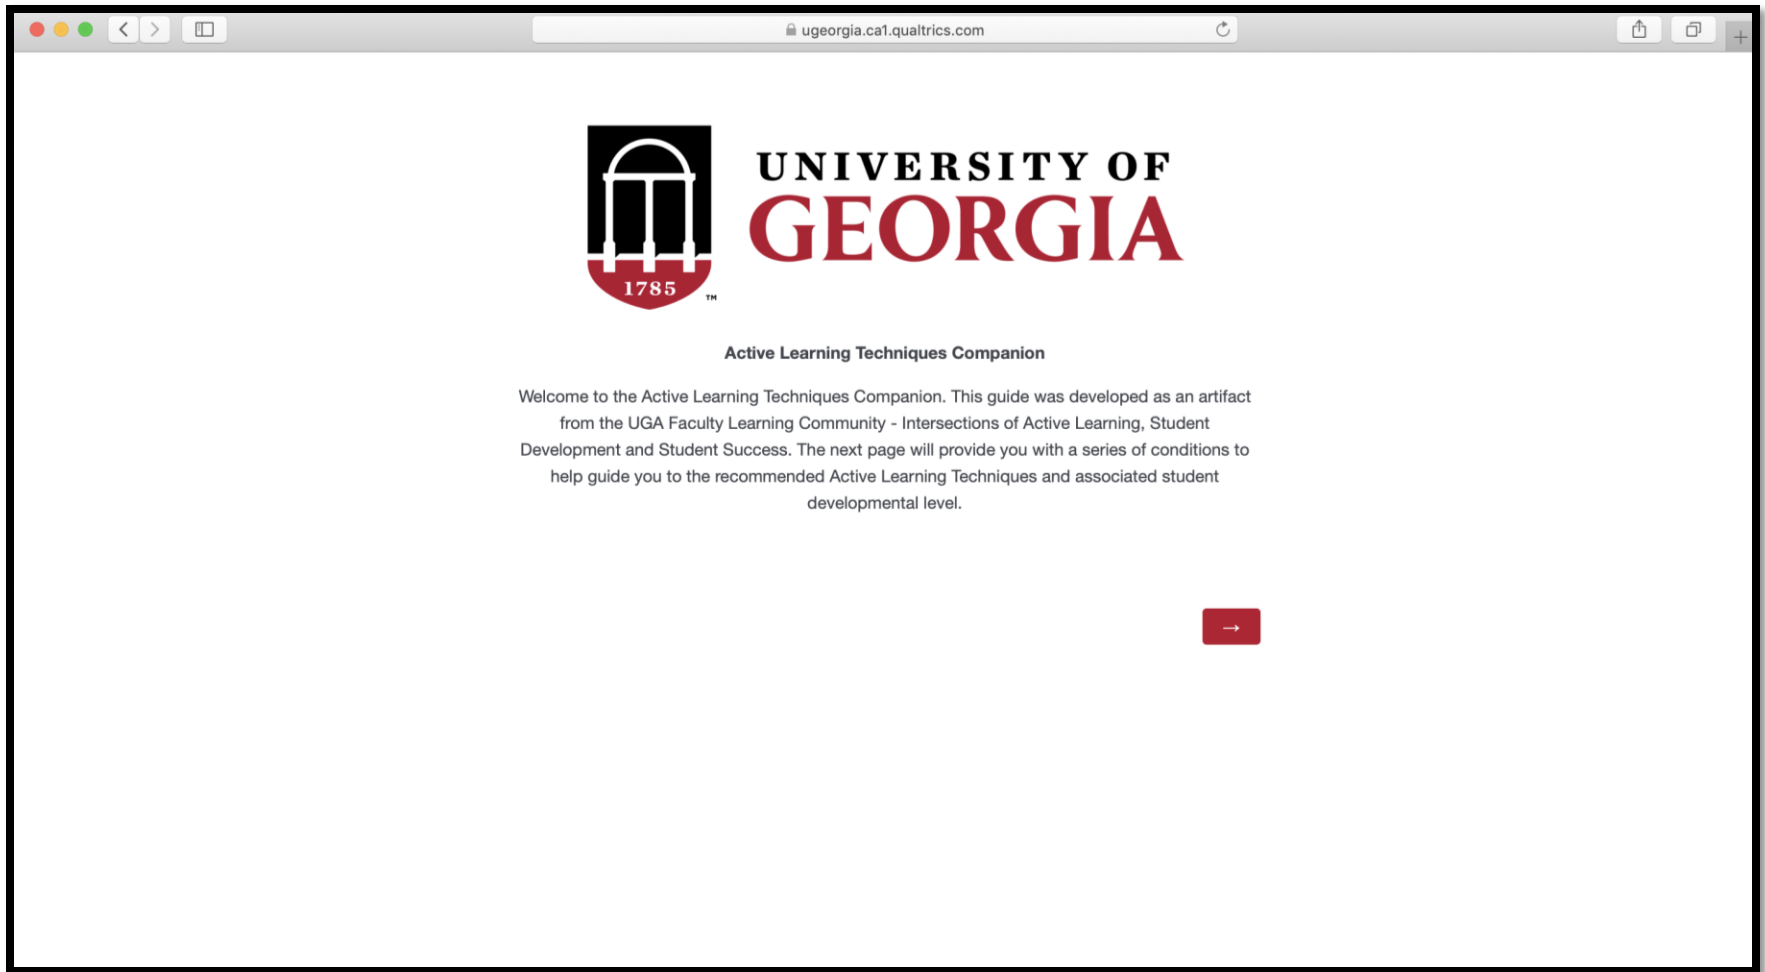

- Active Learning and Active Learning Techniques
- Student Development Theories
- M. Baxter Magolda's Epistemological Reflection Model
  - Focuses on cognitive development
  - Four ways of knowing that are divided into patterns
  - Implications for Teaching and Learning and Active Learning Techniques

# Active Learning Techniques Companion

- Supports purposeful selection of active learning techniques
- Matches situational factors (class size, classroom set-up) with preference for individual or group activity
- Provides information for applying techniques across disciplines
- Provides information about cognitive student development that may help instructors:
  - Adjust activities appropriately
  - Understand prerequisites for cognitive development
  - Potential for activities to promote cognitive development toward the next stage

# Table Conversations: Case Studies

- ✓ Read and discuss the case study at your table.
- ✓ Identify at least 3 activities that you could select to support your ongoing work with this class.
